

UNAS NOTICIAS DE LA CLASE DE ESPAÑOL

2-2-12

With the current unit on the home, the students have been learning sentence formation, both asking for and stating information about the house; several grammar points have been introduced, too. In December, each fifth grader composed a descriptive paragraph about the exterior of a house. Soon, they will be completing a drawing and writing a description of a bedroom. The students are writing wonderful sentences in Spanish.

As the students continue to meet for Spanish class on Mondays and Wednesdays, they need to be diligent in completing their homework, practicing Spanish each day outside of class (ten minutes daily is a suggested goal) and coming to class with **all** necessary materials (Spanish folder, completed assignment, writing tools, and flashcards). On the day assigned, please note that the Spanish assignments with directions are posted on PowerSchool. The upcoming assessment for the third and fourth vocabulary sections of the house unit will be on February 8th; students will need to respond to questions and translate sentences using the accessories and appliances vocabulary.

Muchas gracias for all your encouragement and support while helping your child be successful in learning.

¡Vaya con Dios!

Sra. Bates
